

Q Please tell me how I can make a purchase.

A For details, please input as a question at "[Inquiries](#)", and our sales representative will contact you.

Q Can I obtain it overseas as well?

A Yes, you can purchase it overseas.

For details, please input as a question at "[Inquiries](#)", and we will contact you.

Q Are there limits on use and storage?

A Asahiklin series is not flammable and the Fire Service Act does not apply to it, so there is no limit on the amount used and stored.

Q Is notification necessary when using?

A When using Asahiklin AK-225 series, if the amount that can be used in one year is over 1 ton, and there are over 21 regular employees, the PRTR Law is applicable, so the discharge amount and transportation amount must be reported to appropriate governmental agencies. For Asahiklin AE-3000, AC-2000, AC-6000 series, there is no need to make a notification.

Q Is there an expiration date?

A Production of Asahiklin AK-225 series production in Japan will be abolished in 2020. However, there is no expiration date for any held in stock. For Asahiklin AE-3000, AC-2000, AC-6000 series, there are no limits regarding production and use.

Q Are the containers compatible with the UN?

A The Asahiklin series does not apply to the United Nations Transport of Dangerous Goods, so there is no need to use UN compatible containers. Therefore, the containers are not UN compatible.

Q How should it be disposed of?

A The Asahiklin series does not apply to specially-controlled industrial waste in the "Waste Management and Public Cleansing Act", but we request that you dispose of appropriately as general industrial waste.
